6. Some other ways of promoting international collaboration	23

Introduction

This guide is to provide is to help researchers in the arts, humanities and social sciences at the University of Cambridge to navigate internal and external funding opportunities to set up or maintain international collaboration. Internal collaboration can take many different forms. While large grants can provide ample funding for research collaboration we are focusing this guide on more initial, specific and smaller scale funding opportunities that may lead in direction of such larger scale collaboration.¹ We organised this guide based on the types of funding that you might seek. The first section concentrates on funding for international networks and pilot collaborations either through external or internal funding. The second section focuses on how to bring international scholars to Cambridge through visiting fellowships from a few months up to two years or more. The third section covers arrangements that allow Cambridge researchers to go abroad for a period of time while section four presents funding to set up institutional partnerships with institutions abroad. The last section offers up opportunities how academics can explore new connections through other useful resources, mentoring, participation in assessment, etc.

The following funding schemes are *generic* to arts, humanities and social sciences. Furthermore it only includes funding that researchers based in the UK can apply for. Please also explore international funding options from the side of your collaborators who might have access to additional funding sources in their country of residence. Almost all subject areas will have subject specific funders with schemes for early career and established researchers. These tend to be less competitive and can be found via *Research Professional* alongside all other funding options for UK researchers www.researchprofessional.com. A search on Research Professional can be setup to generate a weekly personalised funding newsletter. Some information about subject-specific funding opportunities may also be found on Department/Faculty websites or newsletters. Departmental contacts for Research Grant Administration can be found at <http://www.ahssresearch.group.cam.ac.uk/Research-support-contacts/>.

The links in this document are live and should allow you to directly access the funder websites. Please note that deadlines for funding calls are subject to change. Applicants are advised to consult the appropriate websites regularly for the latest information.

As part of the 2015 spending review, the UK government has provided £1.5 billion of Official development Assistance for research – the [Global Challenges Research Fundⁱ](#) (GCRF) (mainly for research projects) and the [Newton Fundⁱⁱ](#) (mainly mobility fellowships and institutional partnerships). Funding applications need to be compliant with official development assistance requirements and link with ODA recipient countries. Calls under the GCRF are **NOT included** in the table below. These can be found through the Global Challenges Research Fund website (<http://www.rcuk.ac.uk/funding/gcrf/>) or by subscribing to the Research Professional funding newsletter: <http://www.ahssresearch.group.cam.ac.uk/material/research-professional-registration-and-search.pdf> (a search on Research Professional can be easily set up and personalised to generate a weekly personalised funding newsletter).

¹ For information about large scale funding such as through the Arts and Humanities Research Council, the Economic and Social Research Council, Leverhulme Trust, Wellcome Trust or through Horizon 2020 such as the European Research Council please visit <https://www.ahssresearch.group.cam.ac.uk/res-fund-opp> and contact the School Research Facilitators.

1. a External Funding for International Networks and Pilot Collaborations

AHRC Network Funding

<http://www.ahrc.ac.uk/funding/opportunities/current/researchnetworking/>

The Research Networking Scheme is intended to support forums for the discussion and exchange of ideas on a specified thematic area, issue or problem. The intention is to facilitate interactions between researchers and stakeholders through, for example, a short-term series of workshops, seminars, networking activities or other events. The aim of these activities is to stimulate new debate across boundaries, for example, disciplinary, conceptual, theoretical, methodological, and/or international. Proposals should explore new areas, be multi-institutional and can include creative or innovative approaches or entrepreneurship. Proposals must justify the approach taken and clearly explain the novelty or added value for bringing the network participants together. Proposals for full economic costs up to £30,000 for a period of up to two years may be submitted. The exact mechanism for networking and the duration is up to the applicants to decide but must be fully justified in the proposal. An additional threshold of up to £15,000 full economic cost may be sought to cover the costs of any international participants or activities in addition to the £30,000 fEC scheme limit. Proposals will need to be submitted by an eligible Research Organisation but must involve collaboration with at least one other organisation, as well as having significant relevance to beneficiaries in the UK.

Global Challenges Research Fund: AHRC GCRF Research Networking Highlight Notice for International Development

<http://www.ahrc.ac.uk/funding/opportunities/current/research-networking-highlight-notice-for-international-development/>

The network scheme is intended to support forums to explore the contribution that arts and humanities research can make to challenges, policy and or practice relating to international development. Topics could touch, for example, on questions of sustainability, urbanisation, questions of gender, communities and inclusive participation, cultural life, conflict, etc.

The scheme provides up to £30,000 of funding for up to 2 years for collaboration involving at least one more UK university and an additional £30,000 for inclusion of international partners from the [DAC-list of low and middle-income countries](#) (LMICs) (including Eritrea, Kenya, Sudan, Brazil, India, China, Mongolia, etc.). Participants could include (1) researchers from LMICs, (2) non-academic partners from LMICs and /or (3) relevant international organisations working on issues related to development in LMICs (e.g. international aid, humanitarian or cultural exchange, etc.). The closing date of this highlight notice is **28/02/2017** although applications can be submitted earlier. You have to have opened an application form on Je-S between early and mid-December in order to be able to apply!

Please find more information through the following

link: <http://www.ahrc.ac.uk/funding/opportunities/current/research-networking-highlight-notice-for-international-development/>. The [Highlight Notice can be downloaded here](#).

ESRC Research Seminars

<http://www.esrc.ac.uk/funding/funding-opportunities/research-seminars-competition/>

Strictly speaking this is no networking scheme but bears considerable similarity in terms of format and funding. The ESRC Research Seminars are to establish new or support existing groups of national and researchers, postgraduate students and non-academic users who meet regularly to exchange information and ideas in order to advance research within their fields. It is desirable to also include international collaborators with the aim to establish long-term relationships with overseas social scientists. It is expected that around three seminars will be organised per year. Around 50 awards will be available of up to £30,000 over two to three years. Deadline usually at end of January of each year, but not running 2016-17.

British Academy: International Partnership and Mobility Scheme

(not currently open for applications but expected in 2017)

One-year awards of £10,000 and three-year awards of up to £30,000 were available to support the development of research partnerships between UK scholars and scholars in Africa, Latin America and the Caribbean, the Middle East, Eurasia, South Asia, East and South-East Asia. Awards cover any branch of the humanities or social sciences and are intended to focus on collaborative research on a specific theme of mutual interest, rather than purely on establishing networks. Partnerships can include a range of related activities, and mobility (in the form of visits in both directions, exchanges, etc.) should form an integral part of proposals. The scheme is intended to initiate the development of long-term links between UK and overseas scholars. A number of one-year partnerships were co-funded by the Ministry of Science & Technology Taiwan and the Shanghai Academy of Social Sciences, with a February 2016 deadline. The call for applications is not currently available, however may come back online in 2017. Log into the British Academy's grant application tool e-GAP 2 to view the scheme notes from 2016: <https://egap.britac.ac.uk/Home.aspx>

British Council Researcher Links

<https://www.britishcouncil.org/education/science/researcher-links>

The July 2016 calls have now closed. The next round will likely open in **April 2017**.

The British Council Researcher Links gives early career researchers across selected partner countries the opportunity to form international connections through fully funded workshops and travel grants. Partner Countries: the exact country list may change and will be confirmed with each individual call for proposals. Please check if your country is listed with each call. Previous calls have included the following countries: Azerbaijan, Bangladesh, Brazil, Colombia, Egypt, Indonesia, Kazakhstan, Malaysia, Mexico, Morocco, Nigeria, Pakistan, Qatar, Russia, South Africa, Thailand, Turkey, United States of America (Travel Grants only), Vietnam.

There are two strands of Researcher Links:

- **Travel Grants:** designed to provide financial support for early career researchers to spend up to three months in any partner country participating in the Researcher Links initiative with a view to enhancing and strengthening links for future collaboration, building research capacity in developing economies, and enhancing the researchers' career opportunities. The travel grants are open to early-career researchers that are based in either the UK or one of the partner countries.
- **Workshops:** designed to provide financial support to bring together a UK/partner country bilateral cohort of early career researchers to take part in a workshop focusing on building links for future collaboration and enhancing the researchers' career opportunities. Leading Researchers should apply to be workshop coordinators and propose a theme for the workshop using the application form. It must be a joint application, with one

coordinator based at a UK institution and one based in the partner country. The applicants can be of any nationality, but must be based in the UK or one of the partner countries.

Leading Researchers are defined as being upper R3 and R4, as outlined by the EC in this document. The participants of the workshops must be early-career researchers and must also be based in either the UK or one of the partner countries. See:

<https://euraxess.ec.europa.eu/europe/career-development/training-researchers/research-profiles-descriptors>

Newton Researcher Links

(administered by the British Council)

<https://www.britishcouncil.org/education/science/researcher-links>

Following the same structure as the **British Council Researcher Links** scheme detailed above, the Newton Researcher Links scheme in the first years of the fund is expected to run in the following countries. Please note that not all of the countries will be included in each call. For current opportunities, see: <http://www.newtonfund.ac.uk/funding/funding-opportunities/> Please note that the research area in which applications can be made is guided by the participating organisation in the countries listed below:

- China: UK-China Research and Innovation Partnership Fund
- [India: Newton-Bhabha Fund](#)
- [Brazil](#)
- [South Africa](#)
- [Mexico](#)
- [Colombia: Newton-Caldas Fund](#)
- [Chile](#)
- [Turkey: Newton-Katip Çelebi Fund](#)
- [Malaysia: Newton-Ungku Omar Fund](#)
- [Thailand](#)
- [Vietnam](#)
- [Indonesia](#)
- [Philippines: Newton Angham Programme](#)
- [Egypt: Newton-Mosharafa Fund](#)
- [Kazakhstan: Newton-Al Farabi Partnership Programme](#)
- Kenya (more information coming soon)

Programmes will be tailored to meet national partners' needs. Not all programmes will be run in all Newton Fund countries. The July 2016 calls have now closed. The next round will likely open in **April 2017**.

MSCA European Training Networks (ETN)

MSCA ETN supports competitively selected joint research training for a cohort of doctoral researchers who will carry out their PhDs as part of the network. They are implemented by partnerships of universities, research institutions, research infrastructures, businesses, SMEs, and other socio-economic actors from different countries across Europe and beyond.

Further guidance on the MSCA European Training Network, The next deadline is **10 January 2017**, with full details of the call available here:

http://ec.europa.eu/research/participants/data/ref/h2020/other/guides_for_applicants/h2020-guide-appl16-msca-itn_en.pdf

An overview **factsheet** of the scheme is available [here](#). **Slides from an UKRO Information event** on the scheme (October 2015) can be downloaded [here](#).

Wellcome Trust: Small Grants in Humanities and Social Science

The Trust provides funding for research and training in the medical humanities including the history of medicine and biomedical ethics. Funding is available to researchers in developing countries. For details see www.wellcome.ac.uk & www.wellcome.ac.uk/Funding/Medical-humanities/index.htm

This scheme is for small-scale research projects, scoping exercises and meetings. A Small Grant is usually up to £5,000, although you can apply for up to £10,000 if appropriate (eg you want to hold an international meeting). Support can include: research expenses for small-scale projects; **conference and meeting costs**, with a contribution towards the cost of hosting: a conference; a session within a conference; a symposium; a seminar series. The meeting should either be: for research purposes eg data gathering, to disseminate the findings from your research. The meeting can be held in: the UK, Republic of Ireland or a [low- or middle-income country](#). Costs can include: travel and accommodation for keynote speakers, room hire and catering, event publicity, conference pack publication. A further call will be announced in **2017**.

1. b Cambridge Internal Funding for International Staff Exchange

Cambridge Humanities Research Grant Scheme (CHRG): Tier 2: Standard Grants

The Cambridge Humanities Research Grants scheme (CHRG) supports research in the arts, humanities and social sciences across the University of Cambridge. Under Tier 2, it supports applications to conduct small-scale research activities that enable senior University researchers (usually University Lecturers, or those holding a senior Fellowship) to bid successfully for larger-scale funding, and/or to generate publications, and/or to contribute materially in other ways towards the research objectives of their home institution. The scheme provides £1-£20,000 and can be used, among other things, to support **early-stage network or concept-development activities**, including collaborative work with CRASSH.

There are two open calls each year, with **deadlines in the Michaelmas and Lent Terms**. A cross-School panel will be convened comprising the Head of each of the two Schools, plus another senior academic from each School. Awards may only be held via a Faculty or Department. Applications must be made using the online system hosted by the School of the Humanities and Social Sciences, available here: <https://webservices.admin.cam.ac.uk/ncbk/gabb/fp.cgi>. **For Tier 2:** in addition to the online form, a project proposal (max 2 sides of A4) and one independent and **external** reference will be required.

Cambridge Humanities Research Grant scheme: Tier 3- PSL exchange

The Cambridge Humanities Research Grants scheme (CHRG) supports research in the arts, humanities and social sciences across the University of Cambridge. Under Tier 3, it supports mutual exchange with institutions within Paris Sciences et Lettres (PSL). A list of PSL institutions can be found via: <https://www.univ-psl.fr/fr/membres-de-psl>² and see also the University of Cambridge's page on the International Strategy office website: <http://www.international-strategy.admin.cam.ac.uk/exchanges-and-collaborations/paris-sciences-et-lettres#overlay-context=academic-exchanges>

The scheme welcomes applications from any independent researcher holding a current contract of employment at the University the point of application. All applicants are advised to liaise with their home Department or Faculty to confirm support before making an application. The CHRG will provide funding for exchange visits between Cambridge and other academics or students of between £1k and £10k. Awards will support the direct non-pay costs of organising conferences or seminars – costs for staff time, research assistance or publication costs will not be considered. PSL has agreed to contribute 50% of awards approved by both Universities.

There are two open calls each year, with deadlines in the Michaelmas and Lent Terms. A cross-School panel will be convened comprising the Head of each of the two Schools, plus another senior academic from each School. Applications must be made using the online system hosted by the School of the Humanities and Social Sciences <https://webservices.admin.cam.ac.uk/ncbk/gabb/fp.cgi> For more information, see <https://www.ahssresearch.group.cam.ac.uk/CHRG>, while an example application to the scheme is available here: <https://www.ahssresearch.group.cam.ac.uk/CHRG/Tier3>

² The 25 members of PSL include among others the Collège de France, Conservatoire National Supérieur de Musique et de Danse de Paris, École National Supérieure des Arts Décoratifs, École Nationale Supérieure des Beaux-Arts, École Normale Supérieure, École des Hautes Études en Sciences Sociales, Université Paris-Dauphine, École Nationale des Chartes, École Française d'Extrême Orient, École Pratique des Hautes Études, Centre National de la Recherche Scientifique.

and the full funding guide here:

<https://www.ahssresearch.group.cam.ac.uk/CHRG/CHRGschemenotesv12August2016.pdf/view>

DAAD Cambridge Research Hub: workshops & seed funding

<http://www.cam.ac.uk/daad/about>

The Hub seeks to draw upon and support the activities of all Cambridge scholars working on German-related and comparative themes from any period and from across all subjects in the Arts, Humanities and the Social Sciences. The DAAD Hub encourages Cambridge-based academics seeking to establish collaborations with colleagues at German universities and research institutes and is particularly interested in fostering collaborations that go beyond the bilateral, for example those that link British and German colleagues with networks in North America, Central and Eastern Europe and the developing world. For examples of current workshops, see [Workshops](#).

Funding per event, per year, is up to £5000. Proposals that include matching or partial funding are most welcome. A further **Call will be circulated in the Easter Term 2017**.

All Cambridge staff on research contracts (including senior research associates, CTOs and JRFs) and graduate students registered for a Cambridge PhD may apply, but not visiting or other affiliated researchers. Language Teaching Officers may also apply at the discretion of the Hub Directors and Management Committee. Grant recipients should be on a Cambridge contract or be a registered PhD student at the time the funded activity takes place. For more information, contact:

Ingrid.Hobbis@admin.cam.ac.uk.

Funding through Cambridge in Africa:

<http://www.cambridge-africa.cam.ac.uk/initiatives/>

See in particular:

Cambridge-Africa ALBORADA Research Fund

<http://www.cambridge-africa.cam.ac.uk/initiatives/the-alborada-research-fund/>

This fund was established in 2012 with a generous £1 million donation from The ALBORADA Trust, UK to the Cambridge-Africa programme. The Fund enables principal investigators at the University of Cambridge, across all disciplines, to apply (jointly with a partner at a sub-Saharan African university or research institution) for grants to initiate and/or strengthen research collaborations. Funds are awarded for research costs such as reagents, fieldwork and equipment. African fellows who are members of on-going initiatives of the Cambridge-Africa Programme (i.e. MUII, THRiVE, and CAPREx) and their Cambridge mentors/collaborators are also encouraged to apply for funds jointly, for activities that add value to their existing research projects.

By the end of 2015, the ALBORADA fund had supported 78 research collaborations in 11 African countries, involving 28 African institutions, in more than 30 areas of knowledge, and with 78 African researchers and 86 Cambridge researchers participating. The ALBORADA Trust has therefore awarded a further £4 million to the Cambridge-Africa Programme for the period 2016 to 2026, to support further engagement between Cambridge and Africa (see <https://www.cam.ac.uk/news/cambridge-engagement-with-africa-will-expand-following-major-gift>). This great gift is therefore likely to double the number of awards that were being made to research partners each year, and will ensure that Cambridge's engagement with African institutions is sustained on a long-term basis.

Any enquiries about the Cambridge-Africa ALBORADA Research Fund can be directed to the coordinator, Dr Sophia Mahroo: szm21@cam.ac.uk

Cambridge/Canterbury Academic Exchange Programme

<http://www.international-strategy.admin.cam.ac.uk/academic-exchanges/cambridge-canterbury-exchange-programme>

The University of Cambridge and the University of Canterbury announced with great pleasure the establishment from 2008 of a reciprocal academic visitor exchange programme between the two universities entitled the Cambridge/Canterbury Exchange Programme with the first visits occurring in 2009. The two universities have a lengthy association and a series of distinguished Cambridge visitors to Canterbury over the years.

The goal of the Cambridge/Canterbury Exchange Programme, which will be primarily administered by the University of Canterbury, is to build on the academic links that have already been developed and to benefit the students and staff of both universities by funding the regular visits of academic staff members.

The Memorandum of Understanding between the two Universities, signed in February 2008 refers to: **‘The University of Canterbury and the University of Cambridge, in furtherance of their mutual interests in teaching and research, and as a contribution to increased international cooperation between them, hereby agree to implement, within the framework of the regulations applying in each of the institutions and subject to the availability of resources, the following programmes and activities:**

- **Exchange of continuing academic staff members**
- **Joint research activities**
- **Participation in teaching, seminars and academic meetings**
- **Exchange of publications, academic materials and other information**
- **Joint quality assurance benchmarking.**

The Cambridge/Canterbury Exchange Programme is jointly funded by the University of Canterbury, with assistance for relevant faculties from the bequest of John Angus Erskine, its distinguished graduate in science, engineering and economics and by the University of Cambridge. The Fellowships to be awarded each year are available in all faculties and are additional to those available under the existing Visiting Erskine Fellowships, Visiting Oxford Fellowships, Erskine Grants, Oxford Grants, Visiting Canterbury Fellowships and other leave programmes. See also: [Rutherford Visiting Scholars scheme at Trinity College](#)

2. Bringing people to Cambridge

Note: in addition to the opportunities listed below, Cambridge's Colleges offer a wide range of visiting fellowship and visitor schemes. Those interested are encouraged to look at College website for further information: <http://map.cam.ac.uk/colleges/>

DAAD Visits to Cambridge by German scholars

To encourage long-term scholarly exchange and collaboration funds can be applied for to cover the costs of visits to Cambridge by German scholars, for any period ranging from one week (minimum) to four weeks. Note that German visitors may not apply directly to the Hub but must be nominated by a Cambridge academic who will be prepared to act as their academic host. Proposals will be judged on the value that they add to a group of scholars and graduate students and/or the quality of a future collaborative project/research grant application to be worked on during the visit. Guests should also give a paper/lecture which will be held in the relevant Department/research seminar but also be advertised openly via the Hub website; the general topic should be included in the application.

<http://www.cam.ac.uk/daad/about>

CRASSH International Visiting Fellowships

<http://www.crassh.cam.ac.uk/programmes/interna>

CRASSH Visiting Fellowships are designed to support the Centre's research interests and activities. Depending on the Fellowship, Fellows are usually given office accommodation in the Centre and, where appropriate, funding towards travel, as well as certain practical assistance in their research. CRASSH will also endeavour to arrange residential accommodation and other regular social and intellectual exchanges with Cambridge colleges. CRASSH may also support visitors who come to Cambridge for a period of days or weeks in order to participate in a particular activity organised by the Centre.

Marie Skłodowska-Curie Actions: Individual Fellowships (MSCA-IF)

<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/msca-if-2017.html>

While not an exchange scheme as such, the MSCA Individual fellowship scheme enables Cambridge academics to invite researchers from anywhere in the world to apply to the scheme and be hosted at Cambridge under the supervisor of a Cambridge Host Supervisor, or to host secondments for researchers holding grants at other institutions. It also presents an opportunity for new Cambridge academics (<12 months in the UK) to spend up to two years at another EU or Associated Country organisation, and for Cambridge researchers to apply for a Global Fellowship to spend 2 year outside of Europe, and 1 year back at Cambridge working on their research and training project.

Individual Fellowships (next deadline: 14 September 2017) support the mobility of researchers within and beyond Europe - as well as helping to attract the best foreign researchers to work in the EU. The grant usually covers two years' salary, a mobility allowance, research costs and overheads for the host institution. Individual researchers submit proposals for funding in liaison with their planned host organisation, represented by a Host Supervisor (an established academic at the University who is willing to support the research and training of the incoming fellow). Proposals are judged on their research quality, the researcher's future career prospects, and the support offered by and suitability of

the host organisation. Fellows can also spend part of the fellowship elsewhere in Europe if this would boost impact, and those restarting their career in Europe benefit from special eligibility conditions.

- Fellowships take the form of **European Fellowships or Global Fellowships. European Fellowships** (up to 24 months) are held in EU Member States or Associated Countries and are open to researchers either coming to Europe from any country in the world or moving within Europe. The researcher must comply with the rules of mobility in the country where the European Fellowship is held.
- Return and reintegration of researchers into a longer term research position in Europe, including in their country of origin, is supported via a separate multi-disciplinary **reintegration panel** of the European Fellowships. For the reintegration panel, there is no mobility into Europe. Support to individuals to resume research in Europe after a career break, e.g. after parental leave, is ensured via a separate multi-disciplinary career **restart panel** of the European Fellowships. To qualify for the career restart panel, researchers must not have been active in research for at least 12 months immediately prior to the deadline for submission. Researchers seeking to work on research and innovation projects in an organisation from the non-academic sector will be supported via a separate **multi-disciplinary society and enterprise panel** of the European Fellowships. The objective of this panel is to facilitate career moves between the academic and non-academic sectors and to open attractive career opportunities for researchers outside academia.
- **Global Fellowships** (up to 36 months) are based on a secondment to a third country and a mandatory 12 month return period to a European host. The researcher must comply with the rules of mobility in the country where the Global Fellowship secondment takes place, not for the country of the return phase.

Researchers receiving an Individual Fellowship may opt to include a secondment phase in Europe, notably in the non-academic sector, within the overall duration of their fellowship. The secondment phase can be a single period or be divided into shorter mobility periods. The secondment should significantly add to the impact of the fellowship.

Newton Fund

<http://www.newtonfund.ac.uk/funding/funding-opportunities/>

The Newton Fund promotes the economic development and welfare in partnering countries, through science and innovation partnerships. It aims to strengthen science and innovation capacity and unlock further funding to support poverty alleviation. It is managed by UK's Department of Business, Energy and Industrial Strategy, and delivered through 15 UK delivery partners in collaboration with 16 partner countries. The Newton Fund was launched in 2014 and originally consisted of £75 million each year for 5 years. In the 2015 UK Spending Review it was agreed to extend and expand the Fund. The Newton Fund was extended from 2019 to 2021 and expanded by doubling the £75 million investment to £150 million by 2021, leading to a £735 million UK investment to 2021, with partner countries providing matched resources within the Fund. The funding covers activities in three broad categories:

- **People:** increasing capacity for science and innovation in partner countries.
- **Research:** research collaborations on development topics.
- **Translation:** creating collaborative solutions to development challenges and strengthening innovation systems.

For more information visit: www.newtonfund.ac.uk and follow via Twitter: @NewtonFund

For the humanities and social sciences, the British Academy administers a number of Newton Fund opportunities. In most cases researchers from (some) Newton Fund countries are able to apply to a further strand of the schemes that the BA already has on offer.

Newton Advanced Fellowships

(not currently open for applications but expected in Spring 2017)

<http://www.britac.ac.uk/newton-advanced-fellowships>

Newton Advanced Fellowships provide early to mid-career international researchers who already have a track record with an opportunity to develop their research strengths and capabilities, and those of their group or network, through training, collaboration and visits with a partner in the UK. (For 2016, Malaysia, Mexico, South Africa were the only countries can be applied to). Further deadlines are expected in 2017

Newton International Fellowships

(not currently open for applications but expected in Spring 2017)

<http://www.britac.ac.uk/newton-international-fellowships?frmAlias=/newton-international-fellowships/>

Newton International Fellowships enable researchers to work for two years at a UK institution with the aim of fostering long-term international collaborations. The Scheme aims to attract the most promising early career postdoctoral researchers from overseas in the fields of natural sciences, physical sciences, medical sciences, social sciences and the humanities. The Newton International Fellowships Scheme is delivered by the British Academy, [Academy of Medical Sciences](#), and the [Royal Society](#). Applicants must have a PhD, have no more than 7 years of active full time postdoctoral experience, be working outside the UK, and not hold UK citizenship. **Additional Fellowships will be supported through the Newton Fund, specifically for applicants from Newton Fund partner countries. This new initiative aims to develop long-term sustainable growth and welfare of partner countries through building research and innovation capacity, and forms part of the UK's Official Development Assistance commitment. Newton Fund countries (for applications in the humanities and social sciences) include Brazil, Mexico, South Africa and Turkey.**

Newton Mobility Grants

(not currently open for applications but expected in Spring 2017)

<http://www.britac.ac.uk/newton-mobility-grants>

Newton Mobility Grants provide support for international researchers based in a country covered by the Newton Fund to establish and develop collaboration with UK researchers around a specific jointly defined research project. These one-year awards are particularly suited to initiate new collaborative partnerships, between scholars who have not previously worked together, or new initiatives between scholars who have collaborated in the past. Newton Mobility Grants from the British Academy are currently available for the following countries: South Africa, Turkey, Vietnam. Further calls are expected in 2017.

Leverhulme Trust - Visiting Professorships

<https://www.leverhulme.ac.uk/funding/grant-schemes/visiting-professorships>

Awarded to UK institutions that wish to invite an eminent researcher from overseas to enhance the knowledge and skills of academic staff or the student body within the host institution. The scheme covers maintenance, travel expenses and research costs. Visiting Professorships last between 3-12 months.

The objective of these awards is to enable distinguished academics based overseas to spend between three and twelve months inclusive at a UK university, primarily in order to enhance the skills of academic staff or the student body within the host institution. It is recognised that Visiting Professors may also wish to use the opportunity to further their own academic interests. The sum requested should reflect the individual circumstances of the visitor and the nature and duration of the proposed activities. A maintenance grant up to a level commensurate with the salary of a professor in the relevant field at the receiving institution may be requested. Economy travel costs to and from the UK will also be met. Requests for associated costs, if justified by the programme, may include, for example, travel within the UK, laboratory consumables, and essential technical assistance. Please read the following before submitting an application: [Eligibility](#) and [Application procedure](#).

European Research Council: Visiting Research Fellowships to Cambridge ERC projects for potential ERC applicants from Flanders, Czech Republic, Estonia, Hungary, Poland, Slovenia

<https://erc.europa.eu/funding-and-grants/funding-schemes/other-erc-opportunities>

The ERC Scientific Council has invited relevant national and regional authorities in Europe to fund potential ERC candidates from the country or the region to visit the teams of existing ERC Principal Investigators. The purpose is to offer these potential candidates an opportunity to broaden and strengthen their research profile and vision in an internationally competitive research environment before applying for an ERC grant. These programmes are open to researchers of all disciplines and the main evaluation criterion for the applicants is scientific excellence and their potential to be awarded an ERC grant. These programmes cover all costs pertaining to the research visit including salary, travel and subsistence costs, but require visiting fellows to apply for an ERC grant within a specified time after the end of the visit. It is expected that the visiting fellow, by participating and contributing to a cutting edge research project of the hosting team and receiving the advice of the ERC grantee, will be able to prepare a stronger proposal for the ERC. National and/or regional authorities willing to set up such a scheme can consult the [guidelines](#). [Currently the following programmes are in place:](#)

- **Flanders (Belgium)**, with the Research Foundation Flanders (FWO) [More information](#)
- **Czech Republic**, with the Czech Science Foundation (GA CR) [More information](#)
- **Estonia**, with the Estonia Research Council (ETag) [More information](#)
- **Hungary**, with the National Research, Development and Innovation Office (NKFIH) [More information](#)
- **Poland**, with the National Science Centre (NCN) [More information](#)
- **Slovenia**, with the Slovenian Research Agency (ARRS) [More information](#)

European Research Council: ERC teams open to the world, enables early-career researchers from specific countries outside the EU to join existing Cambridge ERC projects.

<https://erc.europa.eu/funding-and-grants/funding-schemes/other-erc-opportunities>

"Implementing Arrangements" have been signed with key funding bodies and science ministries around the world. These arrangements provide opportunities in Europe for early-career scientists supported by non-European funding agencies to temporarily join a research team run by an ERC grantee. The purpose of the arrangements is to encourage, develop and facilitate such opportunities.

Currently the following arrangements are in place:

- **United States**, signed 13 Jul 2012, with the National Science Foundation (NSF). Read more: [agreement](#), [press release](#)
- **Korea**, signed 8 Nov 2013, with the Ministry of Science, ICT and Future Planning. Read more: [agreement](#), [press highlight](#)
- **Argentina**, signed 13 Mar 2015, with the Ministry of Science, Technology and Productive Innovation. Read more: [agreement](#) [ES|EN](#), [press highlight](#) For the interested CONICET-funded scientists, see more [here](#)
- **Japan**, signed 29 May 2015 with the Society for the Promotion of Science (JSPS). Read more: [agreement](#) [EN](#), [press release](#) For the interested JSPS-fellows, see more [here](#)
- **China**, signed 29 Jun 2015, with the National Natural Science Foundation (NSFC). Read more: [agreement](#) [ZH|EN](#), [press highlight](#) For the interested NSFC-funded scientists, see more [here](#)
- **South Africa**, signed 26 Oct 2015, with the National Research Foundation (NRF). Read more: [agreement](#) [EN](#)
- **Mexico**, signed 12 Nov 2015, with the Mexican National Council of Science and Technology (Conacyt). Read more: [agreement](#) [ES|EN](#), [press highlight](#)
- **Brazil**, signed 13 Oct 2016, with the Brazilian National Council of the State funding agencies (CONFAP). Read more: [agreement](#) [EN](#), [press highlight](#)
- **Canada**, signed 28 Oct 2016, with the Tri-agency Institutional Programs Secretariat. Read more: [agr](#)

3. For Cambridge staff to travel

Many standard research fellowships allow researchers relief from teaching and administrative duties in order to concentrate on a dedicated period of time (3-24months) to conduct research which may be abroad. Often research expenses are limited however which restrict extensive travel plans. Standard schemes include [Leverhulme Research Fellowship](#)³[British Academy Mid-Career Fellowship](#)⁴[British Academy/Leverhulme Senior Research Fellowship](#)⁵[Leverhulme International Academic Fellowship](#)⁶[AHRC Leadership Fellows Scheme](#)⁷. If you are interested in standard fellowships please download the specialist guidance on fellowship applications from the AHSS research website <https://www.ahssresearch.group.cam.ac.uk/res-fund-opps/fellowships/established>. In addition to standard fellowship schemes, some funders provide dedicated support for prolonged stays abroad. Please find a list of these here:

Leverhulme International Academic Fellowship

<https://www.leverhulme.ac.uk/funding/grant-schemes/international-academic-fellowships>

if your proposal is aimed at working and staying abroad in one or more research centres outside of the UK AND the objective of your fellowship is to develop new knowledge, skills and ideas (rather than covering a single research project as such)

deadline early/mid-November each year, 15 awards

The Fellowship covers between 3 and 12 months, £40,000 for teaching replacement, travel, maintenance and research costs; tends to be undersubscribed and is therefore less competitive than the above.

Newton Fund: Reciprocal Schemes for UK Researchers

<http://www.britac.ac.uk/newton-fund-reciprocal-schemes>

Under the Newton Fund, the British Academy's international partners in Brazil, Mexico, South Africa, Turkey, and Vietnam, have opened up further opportunities for research funding for collaborations with the UK. Many of these schemes are directly aimed at researchers based in the UK. Applications for these schemes are submitted directly to the country partner. Opportunities vary depending on scheme and country. Further deadlines are expected:

Brazil: [CONFAP](#)

[Fellowships, Research Mobility Grants and Young Investigator Awards for UK researchers](#)

Mexico: [CONACYT](#) & [Mexican Academy of Sciences](#)

[Advanced Fellowships and Mobility Grants for UK researchers](#)

South Africa: [National Research Foundation](#)

[Fellowships for Early Career Researchers from the UK 2017](#)

Turkey: [TUBITAK](#)

[Research Fellowship Programme for International Researchers](#)

[Fellowships for Visiting Researchers and Researchers on Sabbatical Leave](#)

Vietnam - [NAFOSTED](#)

[Short-term research fellowship opportunities in the UK for Vietnamese researchers](#)

³ <https://www.leverhulme.ac.uk/funding/grant-schemes/research-fellowships>

⁴ <http://www.britac.ac.uk/british-academy-mid-career-fellowships>

Fellowships for UK Researchers – Turkey British Academy/TUBITAK

<http://www.tubitak.gov.tr/en/scholarship/postdoctoral/international-programmes/content-2221-fellowships-for-visiting-scientists-and-scientists-on-sabbatical-leave>

Fellowship Description:

The Scientific and Technological Research Council of Turkey (TÜBİTAK) grants fellowships for international scientists/researchers who would like to give workshops/conferences/lectures, or conduct R&D activities in Turkey in the fields of Natural Sciences, Engineering and Technological Sciences, Medical Sciences, Agricultural Sciences, Social Sciences and Humanities. The program aims to promote Turkey's scientific and technological collaboration with countries of the prospective fellows. Application Deadlines: Applications are accepted on a rolling basis, but also see: <https://e-bideb.tubitak.gov.tr/giris.htm?language=en>

Three types of visit are granted within this program:

Visiting Scientists/researchers on Short-term (up to 1 month):

Short-term fellowships fund is available for the following activities in Turkey:

- Conducting workshops/conferences/seminars etc.
- Giving tutorials/lectures etc.
- Participating in R&D activities
- Organizing technical meetings for scientific and technological collaboration

Visiting Scientists/researchers on Long term (up to 12 months):

Long-term fellowships fund is available for the following activities in Turkey:

- Conducting research and development (R&D)
- Teaching graduate/undergraduate courses etc.

MSCA Individual Fellowships

<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/msca-if-2017.html> Also see above for more information.

4. Institutional and Strategic partnerships with Cambridge

British Academy: International Partnership and Mobility Scheme

(not currently open for applications but expected in 2017)

One-year awards of £10,000 and three-year awards of up to £30,000 were available to support the development of research partnerships between UK scholars and scholars in Africa, Latin America and the Caribbean, the Middle East, Eurasia, South Asia, East and South-East Asia. Awards cover any branch of the humanities or social sciences and are intended to focus on collaborative research on a specific theme of mutual interest, rather than purely on establishing networks. Partnerships can include a range of related activities, and mobility (in the form of visits in both directions, exchanges, etc.) should form an integral part of proposals. The scheme is intended to initiate the development of long-term links between UK and overseas scholars. A number of one-year partnerships were co-funded by the Ministry of Science & Technology Taiwan and the Shanghai Academy of Social Sciences, with a February 2016 deadline. The call for applications is not currently available, however may come back online in 2017. Log into the British Academy's grant application tool e-GAP 2 to view the scheme notes from 2016: <https://egap.britac.ac.uk/Home.aspx>

Newton Institutional Links (administered by the British Council) (not currently open for applications but expected in Spring 2017)

<https://www.britishcouncil.org/education/science/institutional-links>

Institutional Links provides grants for the development of research and innovation collaborations between the UK and partner countries. The grants are intended to provide small-scale seed funding to:

- start and develop collaborations between academic groups, departments and institutions in partner countries and the UK
- support the exchange of expertise and research knowledge
- establish local hubs for UK-partner country activities.

The programme is running under the **Newton Fund** (referred to as Newton Institutional Links), which is part of the UK's official development assistance programme, and also outside of the Newton Fund. Under the Newton Fund, Institutional Links grants facilitate research which tackles local development needs and challenges such as extreme weather conditions, access to affordable health care, food and energy security. Newton Fund grants are intended to support areas relevant to the economic development and welfare of partner countries. For the purpose of the Newton Institutional Links Programme, we define research and innovation with development relevance as activities that have the potential to contribute to the economic development and social welfare of Newton Fund countries, benefitting poor and vulnerable populations in these countries and beyond. Multidisciplinary proposals and proposals in Arts and Humanities and Social Science disciplines are welcome (depending on country-specific priorities in each call). Brief examples of research in the Arts and Humanities which may have development relevance may be found: <https://www.britishcouncil.org/education/science/newton/example-ahss-projects>. Information about Newton Fund partner countries is available here:

<https://www.britishcouncil.org/education/science/newton>

Grants can be between £30,000 to £300,000 over two years and cover costs including: research-related costs; the exchange of researchers, students and industry staff (including

SMEs and not-for-profit organisations); costs of organising meetings, seminars, training; other activities to establish and strengthen collaborative links.

The guidelines for the July 2016 round and further information including eligibility criteria can be found here: <https://www.britishcouncil.org/education/science/current-opportunities/newton-institutional-links-july-2016>. There are currently no calls available, but previous calls have sought applications for collaborations between the **UK and Brazil, Colombia, Egypt, Thailand, or Vietnam, Mexico and Turkey**. Each proposal must have one Principal Applicant from the UK, as well as a Principal Applicant from the partner countries listed above.

Further calls are expected in 2017 for specific countries. All calls will be listed here: <https://www.britishcouncil.org/education/science/current-opportunities> along with all opportunities from British Council Science and Research.

MSCA Co-funding of regional, national and international programmes that finance fellowships involving mobility to or from another country (COFUND)

<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/msca-cofund-2017.html>

The MSCA offer additional funding to regional, national and international programmes for research training and career development. COFUND programmes encourage the movement of researchers across borders and provide good working conditions. The scheme can support doctoral and fellowship programmes.

The next deadline is: **28 September 2017**.

Slides from a recent Information Session (25 May 2016) hosted by the MSCA National Contact point on the COFUND can be found [here](#); and see too slides from one of the speakers, Alan Craig, Head of Sector, COFUND, Research Executive Agency, which are available [here](#).

MSCA Research and Innovation Staff Exchanges (MSCA RISE)

<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/msca-rise-2017.html>

RISE supports short-term mobility (international and inter-sectoral) of research and innovation staff at all career levels, from the most junior (postgraduate) to the most senior (management), including also administrative and technical staff. It is open to partnerships of universities, research institutions, and non-academic organisations both within and beyond Europe. In worldwide partnerships, academia-to-academia exchanges are permitted. The next deadline is **5 April 2017**.

An overview **factsheet** of the scheme and **Slides from an UKRO Information event** on the scheme (February 2016) can be downloaded here: <https://www.ahssresearch.group.cam.ac.uk/res-fund-ops/EUFunding/MSCA>.

EU Framework Programme for Research and Innovation Horizon 2020: Spreading Excellence and Widening Participation

<https://ec.europa.eu/programmes/horizon2020/en/h2020-section/spreading-excellence-and-widening-participation>

Despite serious efforts deployed at national and European level, the European Union sees significant internal disparities in terms of research and innovation performance as also identified in the [Innovation Union Scoreboard](#). These trends are further exacerbated by the continuing severe financial crisis, and the subsequent adverse effects on public research and innovation budgets. Also, there is significant evidence pointing to the fact that the pathway to economic growth and competitiveness is strongly connected to the scaling up of investment in research and innovation. In order to address these challenges, Horizon 2020 introduces specific measures for spreading excellence and widening participation. These measures are targeted at low-performing Member States in terms of research and innovation, and they will be implemented by the Member States most in need of the new [Cohesion policy](#) for the 2014-2020 programming period.

- The **Teaming** action (associating advanced research institutions to other institutions, agencies or regions for the creation or upgrade of existing centres of excellence) is a new feature under Horizon 2020. It will provide new opportunities to the parties involved, with real prospects for growth through tapping into new collaboration and development patterns, including the establishment of new scientific networks, links with local clusters and opening up access to new markets. This will offer national and local research new possibilities for exploitation and value creation and boost the innovation potential of the countries involved.
- **Twinning** will help strengthen a defined field of research in a knowledge institution through linking with at least two internationally-leading counterparts in Europe.
- The **ERA Chairs** scheme will provide support for universities and other research institutions to attract and maintain high quality human resources and implement the structural changes necessary to achieve excellence on a sustainable basis.
- **COST Actions:** Supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks:
http://www.cost.eu/participate/open_call

Further details of these schemes can be found at:

http://ec.europa.eu/research/participants/data/ref/h2020/wp/2016_2017/main/h2020-wp1617-sewp_en.pdf

5. Research Council Grants and Co-Funding Arrangements

This section highlights UK Research Council funding opportunities for UK researchers to collaborate internationally in larger research projects.

AHRC and ESRC's standard eligibility criteria apply.

AHRC and ESRC – International Co-Investigators anywhere in the world

[AHRC and ESRC standard grants](#) (up to £1million over five years, any topic) allow inclusion of international Co-Investigators from anywhere in the world with suitable academic experience. While no overheads can be paid to them, it is possible for them to have research assistance and travel expenses, etc. and in exceptional circumstances salary costs. International Co-I costs can be up to a maximum of 30% of the 100% Full Economic Costs of a Proposal (e.g. £200k in a £600k project). The AHRC pilot on inclusion of international Co-Investigators will run until 31st December 2016 while the ESRC's policy is open-ended. If you are interested in collaborating internationally under the AHRC standard grant scheme then please consider to apply soon.

AHRC and ESRC – Collaboration with US-American colleagues

For collaboration between US-American and UK researchers, both AHRC and ESRC have an agreement with the US National Science Foundation which allows for proposals to be co-funded but only assessed at one end in order to simplify the approval process. ESRC: normal funding limits apply, e.g. between £350,000 and £1million for standard grants for the UK side of the collaboration); AHRC: between £50,000 and £1million for the UK-side of the collaboration.

AHRC and ESRC – Collaboration with Brazilian colleagues (State of Sao Paulo)

For UK collaboration with researchers in the Brazilian state of Sao Paulo, AHRC and ESRC have a co-funding scheme with FAPESP (the Sao Paulo research funding council). The base for the agreement is that funding can be sought up to the maximum of £2million funding level (up to £1million separately for the UK and Brazilian side) (valid until 31/12/2020).

UK Research Councils Global Challenges Fund (up to £1.5billion until 2020)

The Research Councils have recently launched the [Global Challenges Research Fund](#) which will make £1.5billion of research funding available until 2020. The role out of the funds will be gradually increasing with larger calls especially released in 2017 and 2018. The distribution between thematic calls and responsive mode (any topic) is still to be seen. It is expected that proposals need to be compliant with [official development assistance](#) requirements.

6. Some other ways of promoting international collaboration...

Aside from collaborating on an international research project, developing international/transnational/intercultural approaches to your research topic, publishing in a wide range of international journals, applying for network or event funding, receiving academic visitors to Cambridge, or taking part in strategic institutional collaborations, there are a number of other ways in which international research collaboration can be fostered (the list is by no means exhaustive):

- **Advise or mentor** international colleagues or postgraduate students
- **Collaborate on an international consultancy project** relevant to your disciplinary area (see Cambridge Enterprise for more information regarding consultancy: <https://www.enterprise.cam.ac.uk/>)
- **Assess international research projects** (for instance, Cambridge academics may be interested in registering as an Expert in order to act as a peer reviewer in evaluating Horizon 2020 proposals, and assist in the preparation, implementation or evaluation of programmes and design of policies. This includes the Horizon 2020 Advisory Groups. Please see: <http://ec.europa.eu/research/participants/portal/desktop/en/experts/index.html>. As wider context, researchers may also be interested in the Commission's register of Expert Groups, see: <http://ec.europa.eu/transparency/regexpert/index.cfm>.
- Explore the **cross-cutting international activities of Research Councils and Academies**: Research Council UK has an [international section](#) which provides an introduction to the international work of the 7 Research Councils including international strategy, funding, activities and overseas teams (in China, India, US and Europe). **See also**: RCUK Engaging with Europe: <http://www.rcuk.ac.uk/documents/publications/rcuk-engaging-in-europe-aw-lowres-pdf/>
- **Explore international networks for potential collaboration opportunities and ideas**:
 - [EURAXESS - Researchers in Motion](#) is a unique pan-European initiative providing access to a complete range of information and support services to researchers wishing to pursue their research careers in Europe or stay connected to it.
 - [Commonwealth Scholarship Commission](#)
 - [Worldwide Universities Network](#)
- Explore **databases of international scholars with particular expertise** (for example, the Database of Expertise in Middle Eastern and Islamic Studies hosted by the British Academy: the database provides a comprehensive list of experts (scholars, journalists, and other professionals) with expertise in the area of Middle Eastern and Islamic Studies. It also details research links between UK academic institutions and those in the Middle East and North Africa region. See: <http://www.britac.ac.uk/database-expertise-middle-eastern-and-islamic-studies>
- **Draw on international Research Offices and Institutions**, for example:
 - **UKRO**: The UK Research Office (UKRO) is the European office of the UK Research Councils. It delivers a subscription-based advisory service for research organisations (in the main UK HEIs) and provides National Contact Point services on behalf of the UK Government. UKRO's mission is to maximise UK engagement in

EU-funded research, innovation and higher education activities. See:
<https://www.ukro.ac.uk/>

- **British Academy Sponsored Institutes & Societies (BASIS)**
<http://www.britac.ac.uk/british-international-research-institutes>

The British Academy sponsors a network of leading British institutes overseas engaged in research and fieldwork across a wide range of humanities and social sciences disciplines. The sponsored organisations sustain and support UK research overseas, acting as hubs in the local region. They conduct world-class research as well as providing facilities, financial, academic and logistical support and training to researchers. The organisations also collaborate with a wide range of overseas and UK-based partners. They each run an events programme of lectures, conferences and workshops, held in the UK and overseas. Each organisation has its own publication series. All of the organisations are autonomous bodies. The Academy supports six institutes with premises overseas:

- British Institute at Ankara (BIAA)
- British Institute in Eastern Africa (BIEA) based in Nairobi
- British Institute of Persian Studies (BIPS) based in London and Tehran
- British School at Athens (BSA)
- British School at Rome (BSR)
- Council for British Research in the Levant (CBRL) based in Amman and East Jerusalem

The Academy also supports the UK-based Society for Libyan Studies (SLS), and provides administrative support to its long-standing associate, the British Institute for the Study of Iraq (BISI).

- Develop research relationships with international organisations appropriate to your research area (for instance, aid organisations, government, media, professional societies)
- Consider applying for **international research prizes and awards**
- Develop international collaboration through **existing (or new) philanthropic activities**
- Consider international collaboration through **developing innovative research-based knowledge-transfer or business relationships with existing (or new) collaborators:**
 - National Centre for Universities and Business
 - Knowledge Transfer Partnerships: KTPs are a national scheme, which supports collaborative projects involving a ‘Knowledge Base’ partner and a ‘Company’ partner, for example a university and an SME. Projects can be set up to include a period where the researcher is located at the company’s facilities.
 - Knowledge Transfer Networks: KTN is a group of individuals with shared interests in an emerging and strategically significant technology. It provides an easy means of acquiring and sharing knowledge, and participating in the development and employment of that technology. Knowledge Transfer Networks
- Contact the University’s **International Strategy Office** to understand more about the **University’s research priorities areas and established links with Africa, China, India, Brazil, for example. See:** <http://www.international-strategy.admin.cam.ac.uk/>

- Subscribe to **Research Professional**, the online database of research funding opportunities and research policy news – set up a regular funding newsletter around your subject area and key words, including countries. See: <https://www.researchprofessional.com>

ACS and DCW, Academic Division, 5 December 2016
